Printable Coloring Page of Endangered Animals
Ostrich

Michelle Weaver 08

The endangered ostrich, found in Africa, is the only bird of its kind and happens to be the largest bird in the world weighing approximately 300 pounds and 7 feet in height. Ostriches are also the fastest moving birds on land, moving at a speed of 40 miles per hour. This speed allows them to escape predators such as hyenas and jackals. Interesting Factoid: The ostrich eats shoots, stems, leaves, and flower seeds, but they may occasionally eat insects and animal remains.
